ANTI-SCRATCHES	✓	✓

<sup>1</sup>The colour frame ensures that dirt particles that can accumulate over time between the protector and the screen - essentially in the curved protectors - remain hidden behind an opaque layer while maintaining the original appearance of the mobile phone.

<sup>2</sup>100% of the surface of the protector has an adhesive layer -manufactured in Korea- that avoids bulging and bubbles; whereas the protectors of other brands only have adhesive in their perimeter.

<sup>3</sup>Ideus 4D protectors are composed exclusively of tempered glass, including the curved edge area, while other brands of protectors add a TPU perimeter or other plastic in place (with a lower degree of protection).

 **ATTENTION:**  
The attached table only applies to IDEUS screen savers. Not all brands meet the specifications and standards shown here.
